

MINTEX®

BRAKING WITH TRADITION

MINTEX BRAKE SHOE KITS

Brake shoe kits in two versions are now available in the Mintex range of products. The Pro Kit (MSP) is already assembled and can be fitted directly on the axle. The non-preassembled brake shoe kits (MSK) also contain all parts the fitter needs.

In both cases you receive the kit, including wheel cylinders and the matching accessories under one part number. Thus preventing faults caused by incorrect or missing parts. This saves time and money when ordering and fitting.

- 215 Brake kits in range
- Complete with wheel cylinders and accessories
- Pre-assembled for quick and easy installation
- Save around 30 minutes per side compared separate parts
- Less storage space
- Promotes Best Practice fitment
